

ASSIGNMENT – II

1, 2: - Create user table with email USERNAME ,ROLL_NO, PASSWORD and perform insert ,update and delete.

QUERY:

```
create table user(username varchar(255),email varchar(255), roll_no
varchar(255),password varchar(255));
insert into user
values('arun','arun@01','001','arun@01'),('jeeva','jeeva@gmail.com','002','jeeva@02'),
('aruna','aruna@gmail.com','008','aruna@08'),('dinesh','diasfh@gmail.com','024','Poiu
y@24');
select * from user;
update user set email='angel@gmail.com' where roll_no='008';
insert into user values('dineshs','dineshs@gmail.com','025','Omfs@025');
delete user where roll_no='024';
select * from user;
```

The screenshot displays the IBM Db2 on Cloud web interface. The top navigation bar includes links for IBM, Service Details - IBM Cloud, IBM Db2 on Cloud, and a WhatsApp chat. The main interface is divided into two sections: a left sidebar with navigation icons and a central workspace.

In the central workspace, the "Data objects" tab is active, showing a search bar and a list of objects. Below this, the "My script" tab is open, displaying a SQL script in a text editor. The script includes commands to create a table, insert data, update records, and delete records. A "Run all" button is visible at the bottom right of the script editor.

Below the script editor, a "History" tab is visible. The bottom section of the interface shows a table of data results for the query "PQW81844.USER". The table has four columns: USERNAME, EMAIL, ROLL_NO, and PASSWORD. The data is as follows:

USERNAME	EMAIL	ROLL_NO	PASSWORD
arun	arun@01	001	arun@01
arun	arun@01	001	arun@01
aruna	angel@gmail.com	008	aruna@08
aruna	angel@gmail.com	008	aruna@08
dineshs	dineshs@gmail.com	025	Omfs@025
jeeva	jeeva@gmail.com	002	jeeva@02
jeeva	jeeva@gmail.com	002	jeeva@02

The bottom of the interface shows a taskbar with various application icons and a system tray with the date and time (11:58, 14-10-2022).

3. Connect python to db2

```
from flask import Flask, render_template, request, redirect, url_for, session
```

```
import ibm_db
import db2
import re
```

```
hostname ="1bbf73c5-d84a-4bb0-85b9-ab1a4348f4a4.c3n41cmd0nqnrk39u98g.databases.appdomain.
cloud"
```

```
uid = 'ltd41249'
```

```
pwd = '"BS83GfvQfB355UZP"
'
```

```
driver = "{IBM DB2 ODBC DRIVER}"
```

```
db_name = 'Bludb'
```

```
port = '32286'
```

```
protocol = 'TCP/IP'
```

```
cert = "C:/Users/Jeeva/Desktop/ASSGN_NO_2/certi.crt"
```

```
dsn = (
```

```
    "DATABASE ={0};"
```

```
    "HOSTNAME ={1};"
```

```
    "PORT ={2};"
```

```
    "UID ={3};"
```

```
    "SECURITY=SSL;"
```

```
    "PROTOCOL={4};"
```

```
    "SSLServerCertificate={5};"
```

```
    "PWD ={6};"
```

```
).format(db_name, hostname, port, uid, protocol, cert, pwd)
```

```
print(dsn)
```

```
try:
```

```
    print("Connecting to db2. ... ")
```

```
    db2 = ibm_db.connect(dsn, "", "")
```

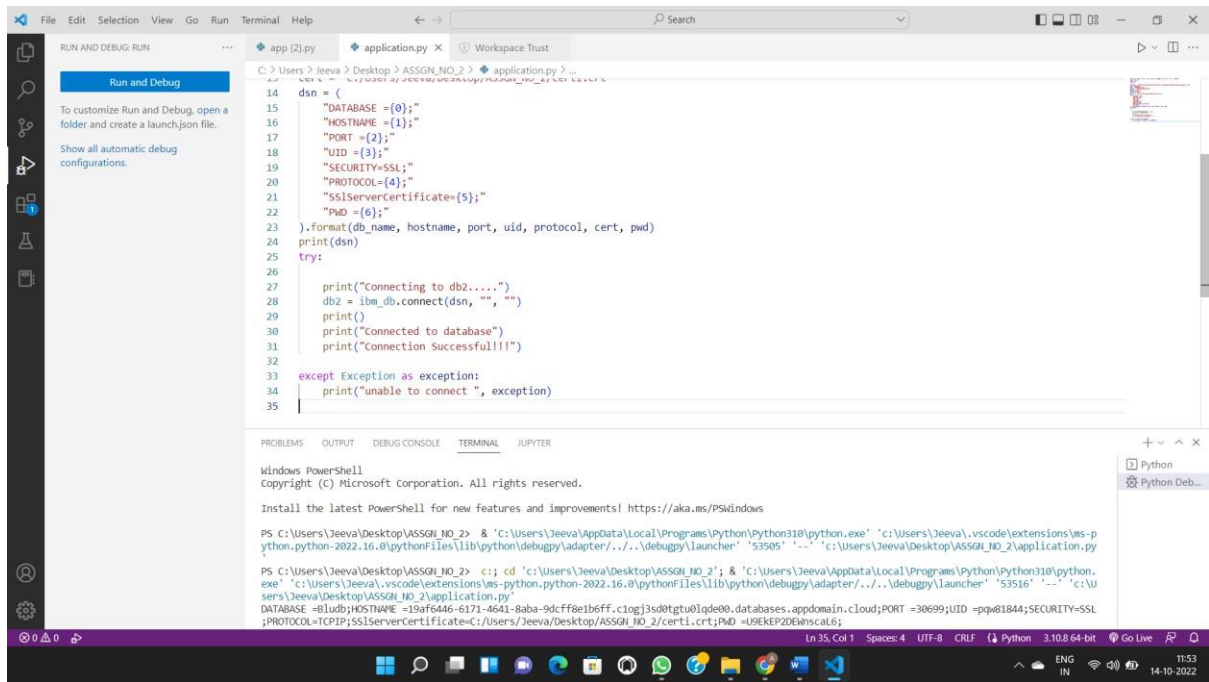

```
    print()
```

```
    print("Connected to database")
```

```
    print("Connection Successful!!!")
```

```
except Exception as exception:
```

```
    print("unable to connect ", exception)
```

4) ACCESS LOGIN WITH CONNTING TO DATABASE

```

from flask import Flask, render_template, request, redirect, url_for, session
import ibm_db

```

```

app = Flask(__name__)

```

```

hostname = "1bbf73c5-d84a-4bb0-85b9-ab1a4348f4a4.c3n41cmd0nqnrk39u98g.databases.appdomain.
cloud"
uid = 'ltd41249'
pwd = "BS83GfvQfB355UZP"

```

```

driver = "{IBM DB2 ODBC DRIVER}"
db_name = 'Bludb'
port = '32286'
protocol = 'TCPIP'
cert = "C:/Users/Jeeva/Desktop/ASSGN_NO_2/certi.crt"
dsn = (
    "DATABASE = {0};",
    "HOSTNAME = {1};",
    "PORT = {2};",
    "UID = {3};",
    "SECURITY=SSL;",
    "PROTOCOL={4};",
    "SSLServerCertificate={5};",
    "PWD = {6};",
).format(db_name, hostname, port, uid, protocol, cert, pwd)
connection = ibm_db.connect(dsn, "", "")

```

```

print()
# query = "SELECT username FROM USER1 WHERE username=?"
# stmt = ibm_db.prepare(connection, query)
# ibm_db.bind_param(stmt, 1, username)
# ibm_db.execute(stmt)
# username = ibm_db.fetch_assoc(stmt)
# print(username)
